Projects

Global Disaster Response Analysis Dashboard (2018 – 2024) | Power BI

- Developed an interactive Power BI dashboard analysing global disaster data (50K+ events, 5M casualties, 253bn economic loss) using DAX, data modelling, and KPI metrics.
- Created advanced visualizations and drill-down filters (maps, waterfall, scatter, heatmaps) to analyse regional trends, disaster types, and performance metrics.
- Built a what-if forecasting model to predict recovery duration and evaluated response time efficiency, enabling data-driven decision-making.

Spotify data analysis | MySQL

- Built and analysed a Spotify dataset using advanced SQL (CTEs, window functions, subqueries) to extract insights on track performance and user engagement.
- Developed complex queries for ranking, aggregation, and cumulative analysis, solving real-world analytical problems.
- Improved database performance by applying indexing and query optimization (EXPLAIN), reducing execution time significantly.

World Defence Exports Analysis | Power Bl, DAX

- Built an interactive **World Defence Exports Dashboard** to analyse global export trends and country performance.
